From Allianz

Keeping your business running safely

Businesses are busy places and keeping everything running smoothly is vital. When things go wrong, not only do they create a headache for you, but it can impact your customers too. That's where Allianz Inspections can help you.

How we can help

Your machinery and equipment needs to be checked regularly to make sure it's safe and won't let you down. Our expert team of engineer surveyors carry out inspections to check for faults or defects which could pose a risk to your employees and customers. They can help keep your business safe as well as make sure you comply with health and safety legislation.

A service that works for your business

We provide inspection services to a range of customers. Whether you run a coffee shop or work in wholesale and manufacturing, we deliver a first class service to our customers, across the UK and Ireland.

If you have equipment which is required to be inspected by law (statutory inspections) then we offer a regular service to make sure you always meet your legal obligations. For other equipment, our team can provide one off inspections - along with bespoke consultancy services and legislation training if you need it.

We're
Local
to you

We have one of the largest teams of engineer surveyors in the UK and Ireland- which means we spend less time travelling and more time inspecting.

As experts, doing a great job is important to us and we're consistently rated highly by our customers. All our surveyors complete rigorous training before they are qualified to inspect your equipment.

Why Allianz?

We understand how important the safety of your plant and equipment is to your business.

It can be tricky to keep up-to-date with all the latest legislation and technical standards which affect your business. That's where we can help you.

Our in-house engineering standards team can advise you of any changes which impacts your business and they can also carry out technical audits and provide technical training for your teams too.

We're experts in health and safety

We hold ISO 17020 (Type A) (Quality Management System) and ISO 45001 (Occupational Health and Safety Management System) accreditations and we're members of RoSPA.

That means we're always up to speed on the latest health and safety developments which will impact your business. And all our engineer surveyors hold a SAFed passport – a certification of competence to work safely across the industry sectors they inspect. So you're in safe hands with Allianz.

We're also UKAS accredited, which means you can be confident we offer an independent, impartial and quality service.

Technical Experts

We inspect a wide range of equipment in order to keep your business safe.

Lift and crane

(including escalators, forklift trucks and motor vehicle lifting tables)

Power press

(including injection moulding machines and woodworking machines)

Electrical and mechanical

(including alternators, control panels, generators)

Local exhaust ventilation plant

(including fume cupboards and shot blast cabinets)

Pressure plant

(including café boilers, hot water boilers and refrigeration / air conditioning plant)

Your engineer booked in with us a couple of days in advance and was prompt and extremely polite. He carried out the inspection in a quiet location so we could carry on working. He explained what he was doing and also explained his findings. 10/10."

We listen to our customers

We always ask for feedback from our customers so that we can offer the best possible service.

97% of our customers rate us 4 or 5 stars out of 5 for overall satisfaction*

*data collected by InMoment 2022

Our customers praise our engineers for their:

- Timeliness
- Helpfulness
- Professionalism

Your guys are always on time, courteous, experienced and willing to talk through any issues they may come across - I have been dealing with Allianz now for well over 10 years and have never had any issue with you or any of your engineers, keep up the good work (and its not often I've said that)."

How we can work together

Working with Allianz is easy.
Here's what you can expect:

1

We'll contact you to make an appointment at a time which suits you – and with an engineer surveyor who knows your business.

2

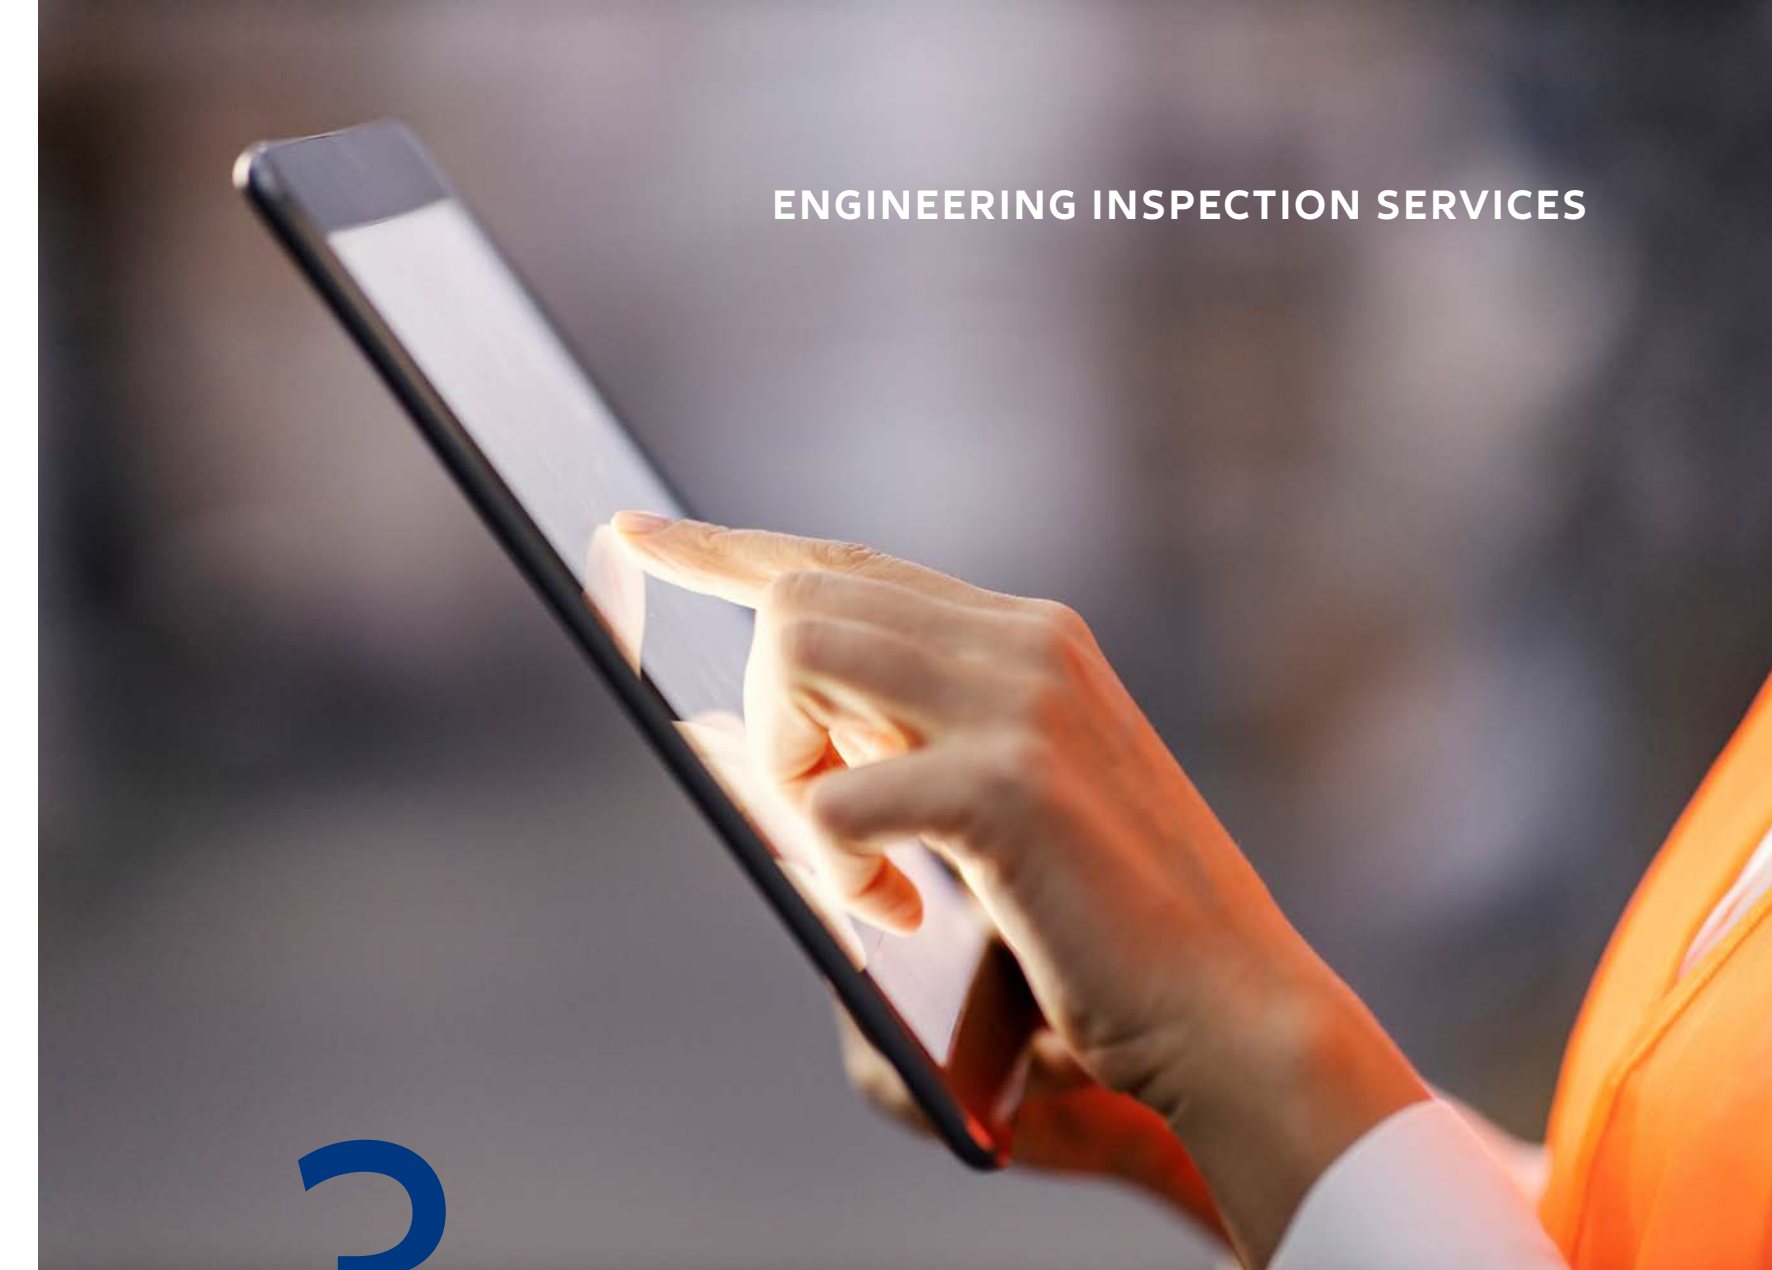

We'll let you know what you need to do before we come. You may need to de-commission the equipment, strip it down, clean it, cool it or help provide access. But don't worry, we'll let you know exactly what you have to do in plenty of time.

4

Finally, you'll get a detailed inspection report after our visit via our Allianz eServices hub where you can keep all your reports together in one place.

3

We'll provide feedback immediately. You won't need to wait around, our engineer surveyors will create reports whilst they are with you so they can discuss any serious problems with you before they leave.

ENGINEERING INSPECTION SERVICES

Shaping tomorrow, together

We work hard to ensure that the way we run our business enables us to have a positive social and environmental impact on our surrounding communities.

We're proud to be one of the top insurers in the Dow Jones sustainability index. We are committed to achieving net zero in our business operations by 2030 and each year we set ourselves performance targets to ensure we are on track to achieve this.
